

Dr. Lonn has been the director of echocardiography for many years and continues to be an active member of the echocardiography group. Additional clinical interests include cardiovascular prevention, coronary care unit and general cardiology.

Dr. Lonn's current research interests include clinical trials in the primary and secondary prevention of cardiovascular diseases, vascular imaging in atherosclerosis, the study of traditional and emerging cardiovascular risk factors, cardiovascular epidemiology and the use of echocardiographic methods for the assessment of left ventricular mass and left ventricular systolic and diastolic function. Dr. Lonn was the principal investigator of several large international multicentre cardiovascular prevention trials and trials in atherosclerosis using carotid intima media thickness. Currently she is Co-Principal investigator of the HOPE-3 trial and of several trials in atherosclerosis.
