

ALVARO AVEZUM

Álvaro Avezum, MD, PhD, is the Director of the Research Division at Dante Pazzanese Institute of Cardiology, Professor of the PhD Program at Dante Pazzanese Institute/São Paulo University, Coordinator Cardiovascular Prevention Program at Brazilian Cardiology Society, and International Research Fellow at Population Health Research Institute, McMaster University.

He received his medical degree from the Federal University of Triângulo Mineiro, MG, Brazil, in 1985; completed his residency in Internal Medicine, followed by the completion of 3-year residency in cardiology, at Dante Pazzanese Institute of Cardiology in São Paulo, in 1990; did fellowship training in cardiology and earned an MSc in Clinical Epidemiology at McMaster University, Hamilton, Canada, from 1993 to 1995; and obtained his PhD in Cardiology from São Paulo University in 2002.

Dr. Avezum's selected contributions include the introduction and cardiologist's training of evidence-based medicine, capacity building and clinical trials, epidemiological studies coordination, clinical practice evaluation and improvement in cardiovascular disease, and the cardiovascular health promotion initiative in Brazil. His main research interests include clinical trials in cardiovascular diseases, evidence-based practice, cardiovascular disease prevention, epidemiological studies, systematic overview, and knowledge translation interventions.

Dr. Avezum has been a steering committee member of 45 studies (randomized clinical trials and epidemiological studies), adjudication committee member of 22 studies, and author/co-author of 112 peer-reviewed published scientific papers, including key articles in high impact journals, such as the NEJM, Lancet, Circulation, JAMA, BMJ, JACC, AHJ, EHJ, and Annals of Internal Medicine. He has been a reviewer of AHJ, AJC, Circulation, and Lancet. h-index: 43
